EduCore School Management System – Project Explanation Report

Page 1: Project Overview & Objective

1. Introduction

The EduCore School Management System is a frontend-based web application developed using HTML, CSS, JavaScript, and React.js. The main purpose of this project is to simplify the process of managing important school records such as student details, class details, teacher records, exam information, and school details through a clean and interactive dashboard interface.

2. Objective of the Project

- Create a digital school record management interface
- Perform CRUD operations (Create, Read, Update, Delete)
- Use React state management for dynamic form rendering
- Store entered data in localStorage for persistence
- Provide a responsive and user-friendly design

3. Technologies Used

HTML, CSS, JavaScript, React.js, Context API, localStorage, React Icons

4. Main Modules

Detail, Student, Class, Teacher, Exam, Show Detail, Footer Contact

Page 2: Working & Functional Flow

5. User Interface Explanation

Header: Branding, Enter Detail, Show Detail, Login

Sidebar: Detail, Student, Class, Teacher, Exam

Dynamic Form: Student ID, Name, Class ID, DOB, Address

Footer: Address, Contact, Email, Social Media

6. Functional Working

- handleChange updates form state dynamically

- handleSubmit validates and saves data

- Duplicate ID prevention

- Delete feature using filter()

Page 3: CSS Design, Features & Conclusion

7. CSS Design Features

Dark theme dashboard, sidebar layout, glow shadow, rounded buttons, hover effects, responsive alignment, footer gradient.

8. Key Features

- Dynamic forms

- Sidebar navigation

- Active tab switching

- localStorage persistence

- Duplicate validation

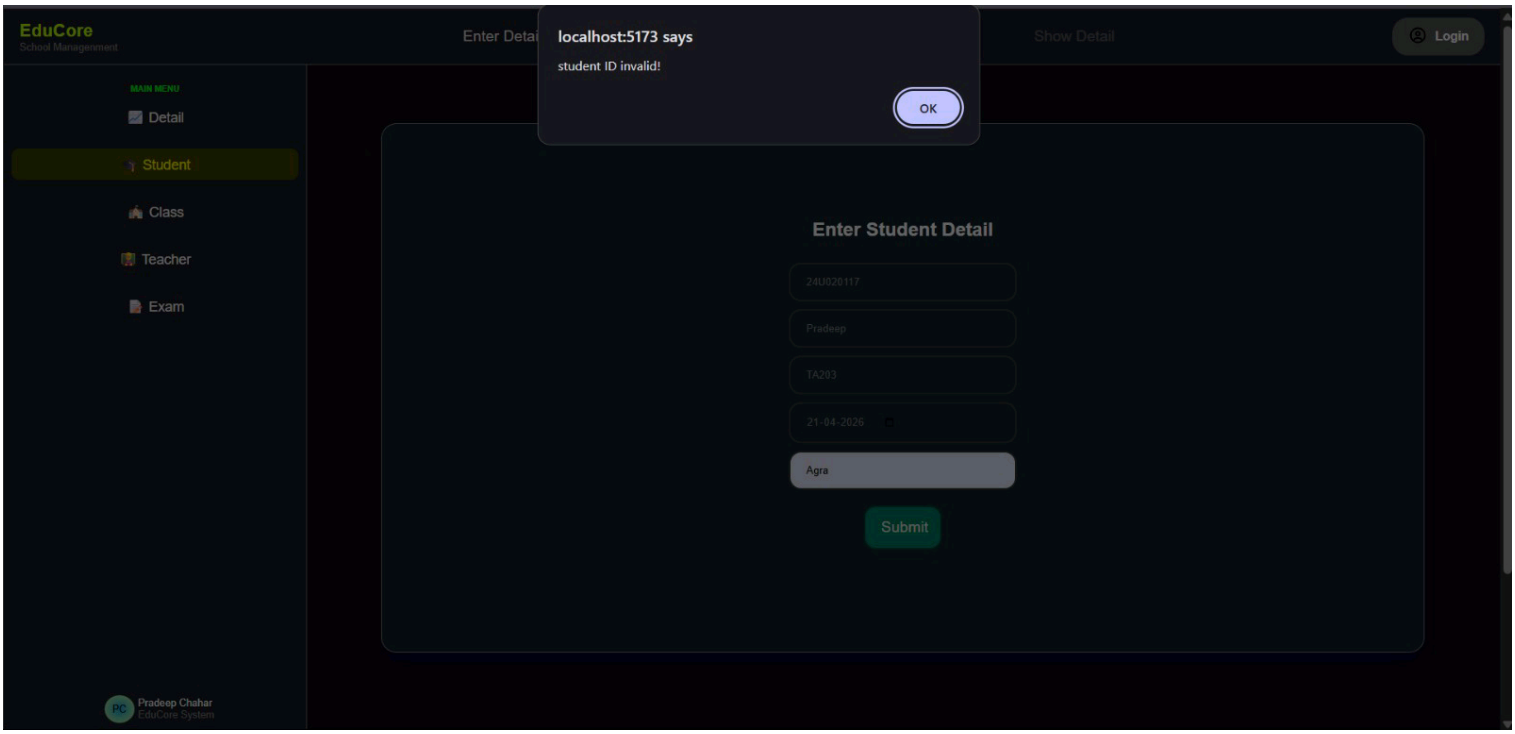

- Delete operation

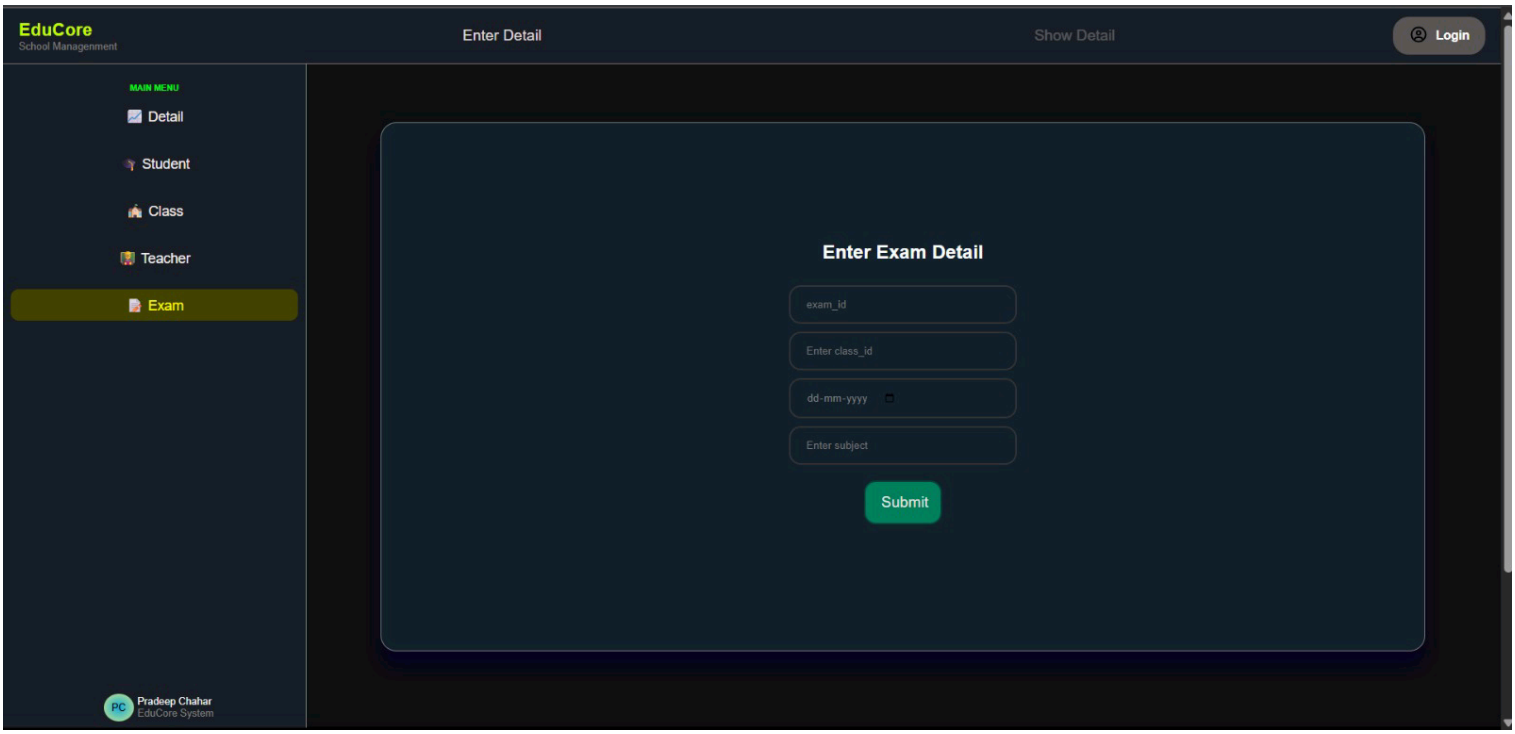

9. Learning Outcomes

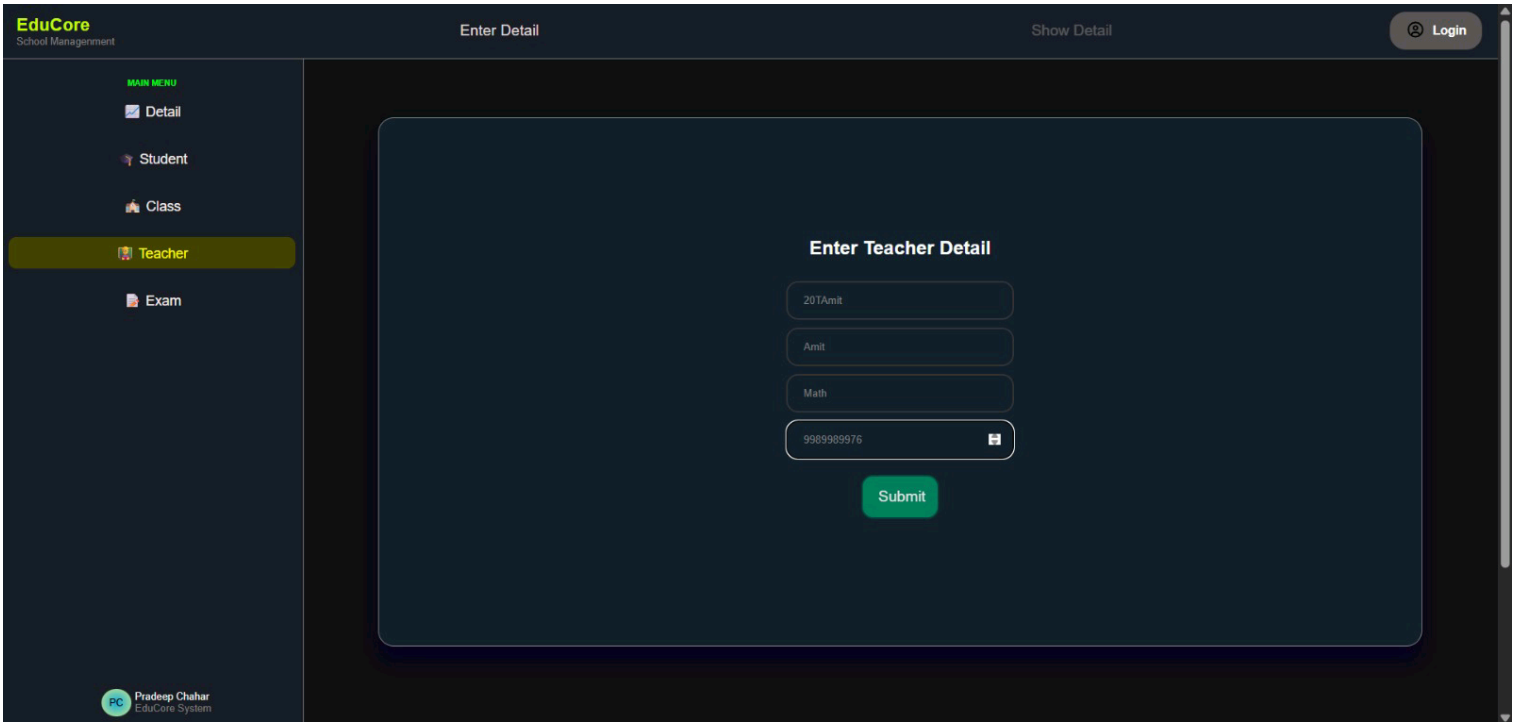

React components, JSX, useState, useContext, conditional rendering, CRUD, localStorage, CSS dashboard design

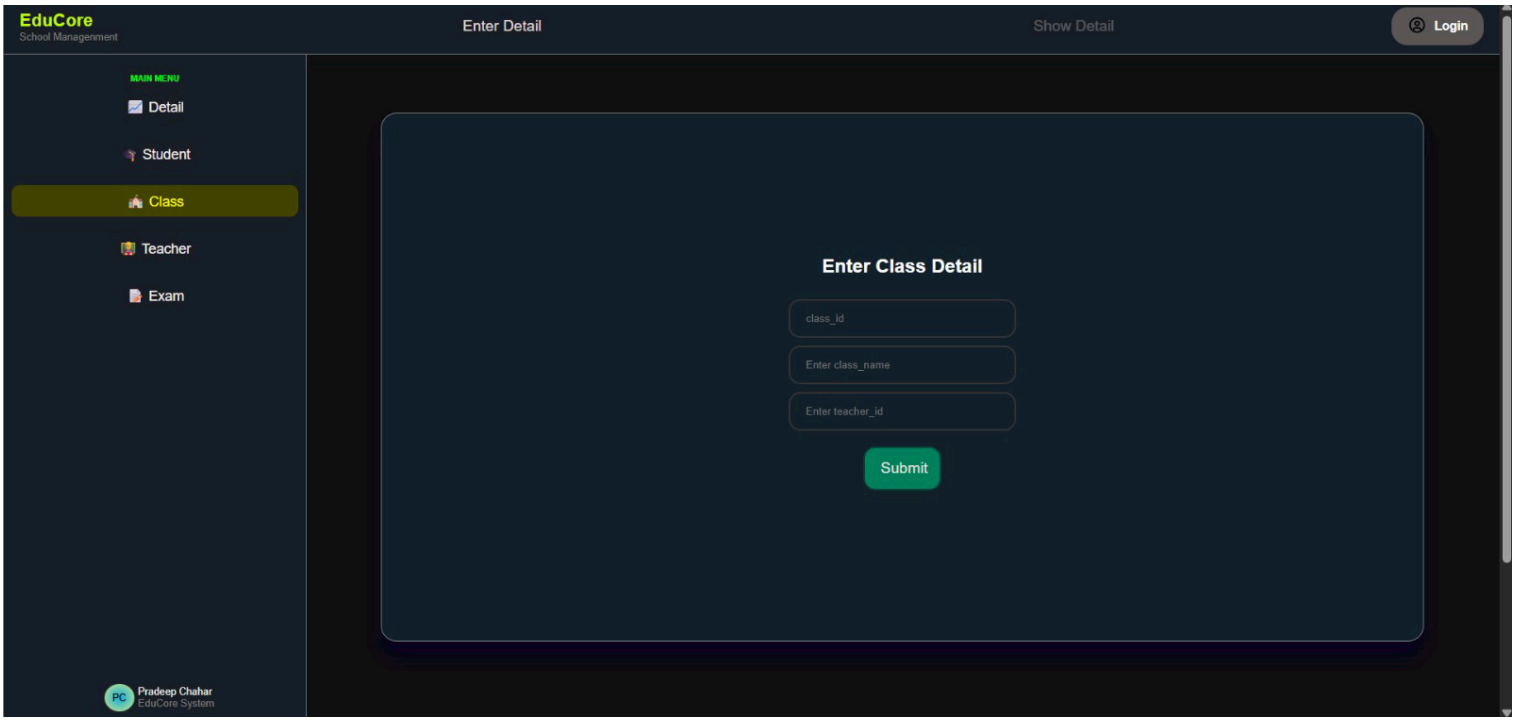

10. Conclusion

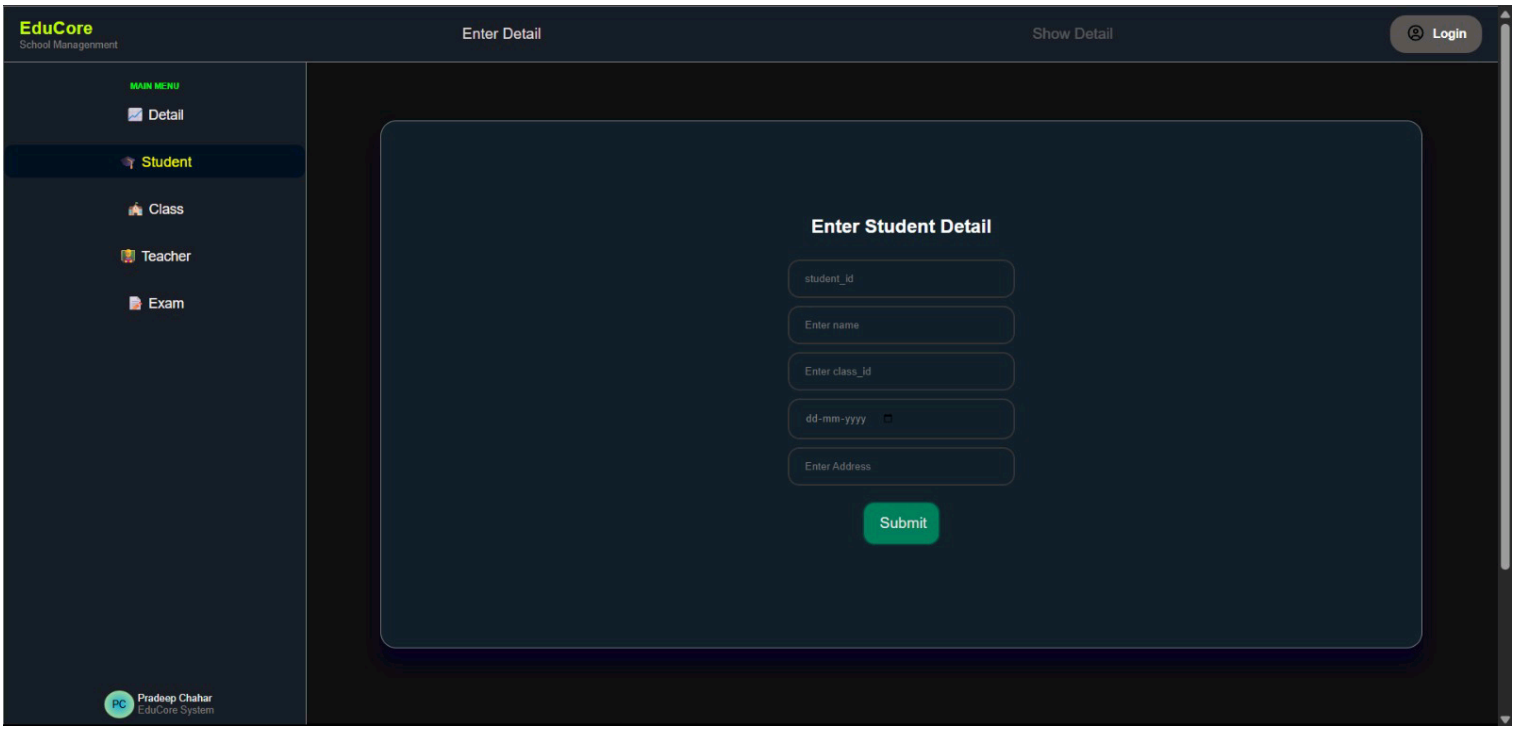

The EduCore School Management System is a strong frontend academic mini-project demonstrating React fundamentals, component design, state management, form handling, and CSS dashboard styling.
